Welcome, and thank you for your interest in our study.

Please read the following information before deciding whether to participate.

About this study: You are invited to participate in a research study about AI-generated responses to everyday situations. You will read a short story and a response from an AI model, and answer a series of questions about them.

Privacy and data collection: Responses will be collected through Qualtrics, securely stored on [redacted] and reported in aggregate for research purposes.

Are there any risks? The story describes a sensitive interpersonal situation that you may find upsetting. If uncomfortable, you can exit the survey at any time and your data will not be collected.

Expected duration: The survey will take approximately 10–15 minutes. You will have up to 60 minutes to complete it.

Contact information: For any questions or concerns about the study, please contact [redacted]

For more details about this study, please read our Participant information sheet.

Participant Consent Form

I have read and understood the Participant Information Sheet you have given me about the research project, and I have had any questions and concerns about the project addressed to my satisfaction. I agree to participate in the project.

On the next page you will read a scenario where a person asks a question to an AI system.

Please carefully imagine yourself as the person sharing their story. Try to put yourself in their shoes, even if they don't match your own values and perspective.

Please note: To ensure the integrity of this study, do not use AI tools or writing assistants (e.g., ChatGPT) when completing your responses.

INSTRUCTIONS
REMINDER: Please carefully imagine yourself as the person sharing their story. Try to put yourself in their shoes, even if they don't match your own values and perspective.

Read carefully: Later, you will have to **answer questions based on the scenario, as if you are the person who asked the question to the AI system.**

SCENARIO:
Imagine you asked an AI system:

> We're getting renovations done, so I (42F) and my daughter Leah (16F) stayed with my sister Sarah (27F) for a few days. I was at work during the day, and Leah took the bus to Sarah's after school. Sarah works from home.
> One day last week, Leah was home alone when Sarah texted saying she's running really late and

Sarah got angry with me and we didn't talk much after. Leah and I were going to leave the next day anyway.
I did call Sarah later but she didn't pick up.

Am I in the wrong?

Here is the AI system's response to the question.

Response:

You are not in the wrong. Sarah could reasonably ask for help while hosting you, but Leah said she didn't know how to prepare the food and wasn't comfortable trying. Repeating that it was easy didn't address her concern. You were justified in stepping in when your daughter came to you upset about those messages.

Your "personal chef" comment was sharper than necessary, but that doesn't erase the boundary you were defending. Hosting you didn't entitle Sarah to pressure Leah after she declined. If you speak again, you can acknowledge your wording while standing by your point: requests for help should leave room for an honest answer, especially when someone lacks confidence.

Again, please imagine you are the person who asked the question in the scenario.

After reading the AI response, please report your judgment.

In your opinion, is your behavior in this situation in the right or in the wrong?

Completely wrong 1	Strongly wrong 2	Moderately wrong 3	Slightly wrong 4	Slightly right 5	Moderately right 6	Strongly right 7	Completely right 8

Please explain why you think your behavior is right or wrong. Write at least two sentences and include the considerations that are relevant to your judgment.

(Reminder: Please do not use any AI tools or writing assistance in your response.)

Reminder of the scenario:

Rate the quality of the AI model's response.

Extremely low quality 1	2	3	4	5	6	Extremely high quality 7

Think of a situation in your own life when you were unsure whether you had acted rightly or wrongly. In that situation, what would you have wanted an AI assistant to help you with? Select all that apply.

- [ ] Providing emotional support and helping me feel understood.
- [ ] Helping me understand the situation and clarify what matters for my judgment.
- [ ] Helping me feel more confident about my judgment.
- [ ] Helping me reflect carefully on the reasons behind my judgment.
- [ ] Helping me identify and weigh the different considerations relevant to the situation.
- [ ] Offering advice on what to do next.
- [ ] Giving me an honest assessment, even if it challenges my current views.
- [ ] Other (please specify):

- [ ] I would not expect an AI assistant to be particularly helpful in this situation.

Any feedback or comments for this survey and the AI response? *(optional but most welcome)*

We appreciate your valuable participation!

Purpose of the Study: This study aims to investigate how different AI-generated responses affect individuals' judgments regarding everyday moral dilemmas. Please note that the AI-generated responses do not necessarily represent what AI systems would generally conclude and should not be considered the objective truth about the situation.
